

Easy Origami Corner Bookmarks

From www.redtedart.com
See website for instructional step-by-step
videos!

How to turn a rectangular piece of paper into a square:

Hold the paper horizontally (the wide way).

Fold a bottom corner up so that the side edge of the paper lines up with the top edge of the paper.

Cut off the extra paper.

For this project, keep the square folded diagonally.

Fold the lower right corner up (the arrow) to meet the top corner (the dot).

Repeat for the left side.

Fold these two back open.

Flip down ONE of the top sheets and crease.

Now fold the flaps you created back up and tuck INTO your bookmark.

Repeat for the other side

Congratulations, you have just created your basic **Origami Corner Bookmark!**

Use this basic technique and the possibilities are endless! You can also YouTube corner bookmark ideas.
